HD3000 SUPER PREMIUM

FMVSS 121 Approved at 23000lbs GAWR
Test Approved at 165 AL (5.5 in Adjuster/30 in Chamber)

HD3000 offers one of the broadest vehicle application ranges for today's braking challenges. HD3000 is engineered to OEM high performance criteria for modern air brake systems. HD3000 has dynamic stopping power and low fade across all temperature ranges with excellent material compatibility for superior wear characteristics on either cast or steel drums. Extreme resistance to road contamination allows brake power to be maintained in severe vehicle conditions both on and off road. Ultra high strength materials resist cracking in all applications.

Application range:
Tanker, Refuse, Off Road, Construction, Aggregate, Logging, Bulkers, Oilfield, Specialty Trailer, Highway Tractor/Trailer, Straight Truck

HD5000 PREMIUM HEAVY DUTY

FMVSS 121 Approved at 23000lbs GAWR
Test Approved at 165AL (5.5 in Adjuster/30 in Chamber)

HD5000 is formulated to offer vehicle braking performance exceeding standard OEM products. High quality materials and extended curing cycles ensure HD5000 delivers performance normally associated with high cost OEM friction. HD5000 is consistent across varied operating temperatures insuring the suitability of this product on a variety of applications. High strength ensures resistance to cracking when used in severe applications. Recommended for use on either cast or steel drums.

Application Range:
Construction, Aggregate, Bulkers, Oilfield, Specialty Trailer, Highway Tractor/Trailer, Straight Truck

HD7100 HEAVY DUTY

FMVSS 121 Approved at 23000lbs GAWR
Test Approved at 165AL (5.5 in Adjuster/30 in Chamber)

HD7100 offers superior lining wear and drum compatibility for the high cycle market segment. Quality raw materials insure consistent performance across a wide range of applications without glazing or cracking. HD7100 offers exceptional brake performance value for cost sensitive applications.

Application Range:
Highway Tractor/Trailer, Specialty Trailer

HD8100 GENERAL DUTY

FMVSS 121 Approved at 20000lbs GAWR
Test Approved at 165AL (5.5 in Adjuster/30 in Chamber)

HD8100 sets a new standard of quality in the economy brake segment. Modern manufacturing technology gives HD8100 stopping power and low lining wear normally associated with more expensive friction products.

Application Range:
Highway Tractor/Trailer

Interchange charts are for general reference only. To select the correct lining for your vehicle application, consult with your FGI sales or service contact.

IMPLEMENTED IN STAGES SINCE 2009, FEDERAL REGULATIONS HAVE SHORTENED THE STOPPING DISTANCE REQUIREMENTS FOR TRUCKS BEING PRODUCED. Truck manufacturers have used the following configurations to be compliant.

A - front drum - rear drum

B - front disc - rear drum

C - front disc - rear disc

The front drum/rear drum configuration requires the use of brake lining with more stopping power than traditional products in addition to increasing the size of the brakes.

Super Stop offers a full line of RSD brake lining on remanufactured shoes. We are pleased to offer **ABEX**, **MERITOR** and **BENDIX** branded products in the RSD category. RSD material is noted in the lining type category of part number listings.

Disc brake pads and components are available at all Fort Garry Industries locations. Our experienced staff will assist in answering any questions you may have about what products and solutions are needed for your application.

Note: the use of RSD brake lining is not a mandatory requirement on any truck or trailer once vehicle has been put into service. There are no legal requirements to specify or mandate RSD products in the aftermarket/service market.

The Super Stop brake lining of your choice is available on all the newer shoe types and sizes.

WASHING:

Before any shoe is handled it undergoes a complete washing process to remove oil, grease and residue from previous use. The pull-through cleaning system uses 300 jet nozzles, spraying water at 185° F without the addition of any chemicals to remove the debris.

DELINING:

Super Stop utilizes an automated and semi-automated operation to remove the old lining from the shoe and prepare it for the next step in the process.

SHOT BLASTING:

Following removal of the lining, each shoe receives extensive shot blasting to completely clean and prepare it for remanufacturing. This is critical to maintaining the overall integrity of the rebuild process.

COINING:

Our 1500 ton coining press corrects imperfections to the shoe's table radius and flatness as well as any twisting or general distortion. Coining leaves lines that run from the cam to the anchor end.

QUALITY CONTROL:

Each shoe is inspected at this point to determine it meets our Quality Control guidelines. Shoes that have deteriorated, broken or exceeded life cycle, are discarded and sent to a steel recycling facility. Brand new steel shoes are constantly added to maintain quality of the finished product. Each shoe is inspected for rust, elongated rivet holes, and roller anchor wear. Super Stop quality control inspections are performed at 10 different stages of the remanufacturing process, including final packaging.

PROTECTIVE COATING:

Our SuperSeal Coating, has been specially formulated to withstand the effects of de-icing products used across the country, protecting the shoe from any re-emergence of rust, commonly referred to as rust-jacking.

RIVETING:

Super Stop's riveting machines are capable of doing 8 mm, 10 mm, 3/8" and 1/4" rivets. These machines are able to accommodate for differences in table thickness. Each machine has an automatic rivet feed to ensure that the rivets are properly fed into the shoe.

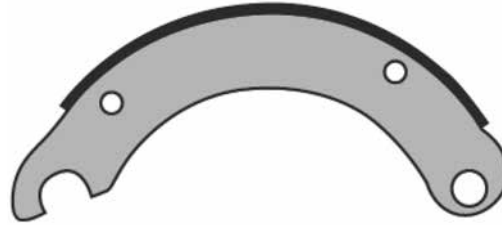

RELINING:

The Super Stop remanufacturing process is all about providing a solid brake foundation. We take relining shoes to the next level for our customers by attaching the brake lining of choice to their shoe. The result is an OE quality relined brake shoe ready for installation.

There is a difference... Super Stop is a complete re-manufacturing process committed to producing a quality OEM shoe...every time.

SUPER STOP PRODUCTS WARRANTY

HIGHWAY EXCHANGE BRAKE SHOES

BRAKE SHOE ASSEMBLIES

Fort Garry Industries Ltd. warrants all remanufactured Super Stop brake shoe assemblies against defective workmanship for the useful life of the friction material. This warranty is additionally supported by the warranties provided by the original component manufacturers. The Super Stop warranty liability is limited to the brake shoe assembly components and specifically does not extend to special, incidental, or consequential damages.

All Super Stop brake shoes carry a 3 year limited warranty against corrosion damage or rust jacking of the brake shoe table or web.

WARRANTY POLICY TERMS & CONDITIONS

The Super Stop warranty will not apply if failure is due to lack of required maintenance, misuse, abuse, damage by accident, improper application, improper installation or serial numbers removed or defaced.

The obligation of Fort Garry Industries Ltd. under this warranty is limited, upon inspection of failed parts, vehicles, and maintenance records, to repair or replace any Super Stop products.

The liability under this Warranty Policy shall not exceed purchase price.

FORT GARRY INDUSTRIES offers an industry first wheel end package that lets you choose from the leading brands you know and trust.

FORT GARRY INDUSTRIES warrants all the components in the wheel end provided that all components were purchased from Fort Garry Industries. If any of the applicable components fail due to a manufacturer approved warrantable failure and cause subsequent damage, Fort Garry Industries will replace the other wheel end damaged components.

- Trucks – 2 Years or 500,000 KM's

**Not to exceed component warranty period

This warranty applies to components installed on vehicles licensed for on-highway and line-haul use only. This warranty does not cover normal wear and tear, improper use, incorrect installation, accident, improper maintenance or any other condition that would be deemed to cause product failure. Warranty subject to approval from component manufacturer that part was defective. This warranty covers parts only replacement and Fort Garry Industries will not be liable for any labour, towing or other unspecified costs or liabilities. Credit not to exceed product purchase value. This warranty cannot be combined with any other warranties. Warranty will be issued as a credit to the Customer's account.

This warranty is subject to change without notice from Fort Garry Industries Ltd.
